Top Tips

Follow these simple steps to ensure your brows are kept in good condition during lockdown:

1. Don't touch them! Give your brows 6 weeks to grow in before you pluck them and always pluck in natural light.
2. Focus on the shape - your brows should start at the same point as your nostril. Pivot the pencil over to the edge of your iris - that's your arch point. Pivot again to the corner of your eye and that's where your brow should end.
3. Remove little fuzzies with a shaping razor to clean up all the fuzzy hair just above and in between your brows. (I buy packs of 20 from Amazon SHW 20PCS Eyebrow Razors.)
4. Fill in the gaps using an eyebrow pencil, or (as I do) brown eyeshadow, this is a must for if you are waiting for your perfecting top up, or due a colour boost!
5. Apply a nourishing oil to your brows twice a day. If you're like me you have regular tinting of PMU and this can cause your brow hair to become dry, so use a good quality brow serum to condition the brow hairs. I sell the Nouveau one for £20, which last months!
6. Brush! Brushing your brows helps stimulate the bloodflow and encourage growth. So brush those babies twice a day!
